Seasonal dynamics of alkaline phosphatase and mineralization in sandy beaches in northeastern Brazil. The seasonal dynamics of alkaline phosphatase and calcium and phosphorus in sand samples were evaluated along a 14-month period in the Santos Dumont State Park (SP) beach, located on the south coast of the State of Rio de Janeiro. The following sand parameters were measured: grain-size, pH, electrical conductivity, Na, K, Mg, Ca, P, and Al. The study was carried out in four different areas, and measurements were taken monthly, from May 2002 to February 2003. Data analyses were performed by the linear regression of the mineral concentrations and the electrical conductivity and by the non-linear fitting of the concentration of electrical conductivity and pH to the linear regression. Calcium and phosphorus concentrations increased during the dry season, while pH, electrical conductivity, and alkaline phosphatase concentration were more related to the rainfall period. Alkaline phosphatase correlated positively with the concentrations of calcium and phosphorus ( $R = 0.64$ ,  $P = 0.01$ ). The results showed the influence of rainfall on alkaline phosphatase concentration in the sand.

As of the update release of AutoCAD to version 2.1 on October 19, 2006, the ability to save, preview, or email a single page of drawings created in AutoCAD is not supported. The ability to do so is possible in AutoCAD 2019 and earlier. Overview of new features Perhaps the most striking feature of AutoCAD 2023 is its ability to import diagrams, forms, and drawings from other software programs that use the PDF file format. You can send feedback, documents, drawings, graphs, charts, and images to AutoCAD as part of your drawing process by importing from other software programs. You can also import files created in other software applications and import documents created in other programs, such as PowerPoint®, into AutoCAD. Importing drawings allows you to incorporate feedback into your drawing
